SOBRE MIM

I study programming since my 14-year-old, I love coding because you can resolve problems, and optimize situations exist in day bases. I work with developing since 2016 and I made many projects, from E-Learning with Moodle to complete system about catastrophe monitoring. I'm a calm and dedicated person. I really like to learn new things and help other people when I know that I can do it the right way. During my career I have been able to develop skills that go beyond writing codes, such as analytical, creative, and collaborative skills. I believe that communication is critical to building a good user experience.

EXPERIÊNCIA PROFISSIONAL

Frontend Developer

LEO Learning Brasil [04/11/2019 – Atual]

Cidade: Rio de Janeiro
País: Brasil

Working on developing themes, plugins and customizations in the backend and frontend area for the EAD platform called Moodle.

I developed several projects all focused on distance learning, each with its own customization according to its business rules

Technologies: REACT, PHP, MariaDB, RequireJS, Mustache, Sass and Bootstrap

Frontend Developer

Trinks.com [04/11/2018 – 04/11/2019]

Cidade: Rio de janeiro
País: Brasil

My work is focused on developing the front-end demands of the Trinks.com system and its application, Trinks is a management and scheduling system for beauty salons throughout Brazil.

In trinks I developed the frontend of several system screens, payment, scheduling, calendar, user administration and more, in trinks I also developed themes for the client's scheduling application

Technologies: ASP.NET, CSS, SASS, JavaScript, HTML5, Razor, SQLServer, Knockout.js, BEM and ITCSS Standards.

Frontend Developer

LEO Learning Brasil [04/06/2018 – 04/05/2019]

Cidade: Rio de Janeiro
País: Brasil

Working on developing themes, plugins and customizations in the backend and frontend area for the EAD platform called Moodle.

I developed several projects all focused on distance learning, each with its own customization according to its business rules

Technologies: PHP, MariaDB, RequireJS, Mustache, Sass and Bootstrap

Frontend Developer

Trinks.com [04/09/2017 – 04/06/2018]

Cidade: Rio de Janeiro
País: Brasil

My work is focused on developing the front-end demands of the Trinks.com system and its application, Trinks is a management and scheduling system for beauty salons throughout Brazil.

In trinks I developed the frontend of several system screens, payment, scheduling, calendar, user administration and more, in trinks I also developed themes for the client's scheduling application

Technologies: ASP.NET, CSS, SASS, JavaScript, HTML5, Razor, SQLServer, Knockout.js.

Full Stack Developer
Agency AspecTI [04/04/2017 – 04/09/2017]

Cidade: Rio de Janeiro
País: Brasil

While at Aspecti I had the opportunity to work on two projects, one of which was the SOS Communities Scholarship system, and the other was the OS One system which is a System/App that managed called Profarma Group pharmacies. The Profarma group is the most diversified player in the health sector in Brazil, with operations in Distribution, Specialties and Retail. Technologies used for development are ASP.NET, CSS, JavaScript, JQuery, HTML5, Razor, SQLServer, Entity Framework among others.

Freelancer
Own Business [04/06/2016 – Atual]

Cidade: Rio de Janeiro
País: Brasil

As a freelance I do more projects aimed at the frontend, but I have also taken and picked projects where I develop systems in which I also do the backend part.

Technologies: React, Vuejs, PHP, Laravel, Wordpress, HTML, CSS, SASS, Javascript, Jquert, Bootstrap, Phonegap, React Native
